

***Study overseas in Australia!***  
COLLEGE TO UNIVERSITY TRANSFER OPTIONS

We'll guide you  
**every step of the way.**

*“ I just wanted to thank the entire KOM team, I really appreciate the frequent communication and prompt responses ... You've made this process a lot less stressful on me, and I am very grateful! ”*

- R. Camelett

Thinking of attending university? Have you ever considered studying in another country?

You might be surprised at how quickly you can reach your academic goals studying abroad.

## WHO WE ARE

As the official representatives and application centre for select Australian universities, KOM Consultants has been appointed by these institutions to assist you through all of your transfer planning needs - from initial questions to application procedures; student loans; scholarships; housing options; the student visa process; travel options - everything to help you get there and stay focused.

## A SEAMLESS TRANSITION

Since 1995, KOM Consultants has provided pathways for Canadian Community College students to convert their diploma to degree qualifications. As the foremost experts in international pathways for college students, we know first-hand the challenges faced by students seeking academic standing for previous studies.

Our articulation programs make this transition seamless. To date, we have been instrumental in developing transfer programs with more than 35 Community Colleges across Canada. KOM continues to develop strong relationships with college transfer offices, as well as academic staff.

- **Three-year Advance Diploma graduates can earn a degree in as little as one academic year**
- **Two-year Diploma graduates can earn a degree in as little as three semesters**
- **Applied Degrees or Graduate Certificates pathways into Master's degrees**

***Employers will know that you can handle new situations and global initiatives. You will gain more than***

***just a qualification. Our students' experience overseas makes a huge impact in their careers.***

## Imagine living and studying in an exotic location like Australia!

With employment opportunities for graduates becoming increasingly more competitive, employers are now looking beyond someone's academic background - they want the whole package: the right skill-set, life experience, a self-starter with problem solving skills and the ability to be creative. Students who study overseas gain these qualities and set themselves apart from others. Make yourself stand out.

## ***An earlier graduation means an earlier start at your new workplace.***

One of the key benefits of studying overseas is the shorter time required to complete your degree qualifications. Taking this into consideration, the overall costs associated with international studies are comparable to domestic expenses over a longer period of time. In most cases, overseas studies will allow you to graduate sooner, entering the workplace faster than Canadian transfer options.

## ***Scholarships are now available through KOM Consultants' transfer programs.***

There are a number of financial resources available for students studying overseas. These range from provincial student loans, personal bank loans or lines of credit, to being granted working privileges while overseas.

In addition to these options, a select number of universities offer scholarships specifically for Canadian college students.

As a result of our dedicated work, the gap between a college diploma and a university degree is much closer. Put your goals within reach.

Our university transfer programs continue to build new and attractive study options for college students. KOM has set the standard in Canada for international articulation programs.
